3d rendering, building designing, cost estimation, landscape designing, project management, project planning, technical drafting

EDUCATION

Mdete Primary School (1997 - 2003)

Primary School

Here I just studied fromHere, I studied from standard 1 to 7, even though I shifted between schools because of my parents' jobs. std 1 - 7, even though in btn i shifted btn schools due to parents jobs

Kidugala Lutheran Seminary Secondary School (2004 - 2007)

Science & art subjects

I enjoyed the seminary; I learned a lot and also discovered my self-determination when deciding to pursue something.

Kibaha Secondary School (2008 - 2010)

Physics, Chemistry, Mathematics

I love Kibaha; it's all about making your own decisions and living your life to the fullest. I've met incredibly smart people there who have encouraged me to see that my goals are not limited--I can dream bigger than I ever thought possible.

CoET UDSM (2010 - 2014)

Bachelor of Science in Civil and Structural Engineering

At CoET, I studied engineering, which reshaped the course of my life. I met lifelong friends who will always be a part of my journey. I discovered my strengths, priorities, and even my failures. Specialization and prioritization became clear to me. Additionally, I realized the weaknesses of the education system concerning individual potentials. I learned that one should not be constrained by the limitations of the established education system but rather focus on their purpose and visions.

CERTIFICATES & LICENCES

Driving Licence (Jan 2020)

The Government of Tanzania

Driving Licence grade D

AWARDS

- Best Students in Mathematics
